Paragraph 1. To complete this paragraph, you must check only the box that applies. If there are no orders for child support in any other court case, you must check the first box. If there is another order for child support in this state or any other state, you must check the second box and enter the name of the court (for example, District Court of Douglas County or Lancaster County Juvenile Court), the case number, the amount of support, and the number of children.

Paragraph 2. Enter the name of your current employer and the amount of your monthly income before any deductions (gross income). If you are not employed enter "not employed" on the first line and go to the next paragraph.

(a) Here is how to figure monthly income. All income should be annualized and divided by 12. For example:

- (1) If a person is paid hourly, the hourly rate should be multiplied by the number of hours worked per week. That figure should be multiplied by 52 and then divided by 12. This would be a person's monthly wage (hourly rate x number of hours worked per week x 52 weeks in a year ÷ 12 months in a year = monthly wage).
- (2) If a person is paid a weekly salary, the weekly salary should be multiplied by 52 and then divided by 12. This would be a person's

- monthly wage (weekly salary x 52 weeks in a year ÷ 12 months in a year = monthly salary).
- (3) If a person is paid a salary every other week, the amount of salary paid should be multiplied by 26 and then divided by 12. This would be a person's monthly wage (salary paid every two weeks x 26 pay periods in a year ÷ 12 months in a year = monthly salary).
 - (4) If a person is paid a salary two times a month, the amount of salary paid should be multiplied by 24 and then divided by 12. This would be a person's monthly wage (salary paid two times a month x 24 pay periods in a year ÷ 12 months in a year = monthly salary).
